About EverSeal

Crafting Comfort, Layer by Layer

EverSeal Insulations is an Abu Dhabi-based waterproofing and insulation specialist, established in 2022. We were founded by experienced insulation professionals who moved from independent application work to building a dedicated, reliable company — bringing advanced spray machinery, trained applicators and a quality-first approach to every project.

From a single villa roof to large commercial rooftops and water tanks, we match the right system to the structure and apply it to a measured, tested standard that lasts — across all seven emirates.

2022	Abu Dhabi	10 yrs
Established in the UAE	Serving all UAE	Up to, warranty

Our Services

A complete range of waterproofing and insulation systems for the UAE climate.

Polyurea Spray Coating

Seamless, fast-curing membrane

PU Foam Insulation

Heat insulation + waterproofing

Combo System

Foam + membrane + top coat

Membrane Waterproofing

Torch-on & liquid systems

Metal Roof Coating

Seals seams, screws & laps

GRP Tank Lining

Leak-proof water-tank linings

Epoxy Flooring

Durable, chemical-resistant floors

Crack Injection

PU/epoxy leak sealing

Why Choose EverSeal

Seamless, joint-free systems

Polyurea and PU membranes cure into one continuous layer — no laps or seams to fail.

Built for UAE conditions

High UV resistance, thermal-cycling tolerance and crack-bridging elongation over 350%.

Manufacturer-backed materials

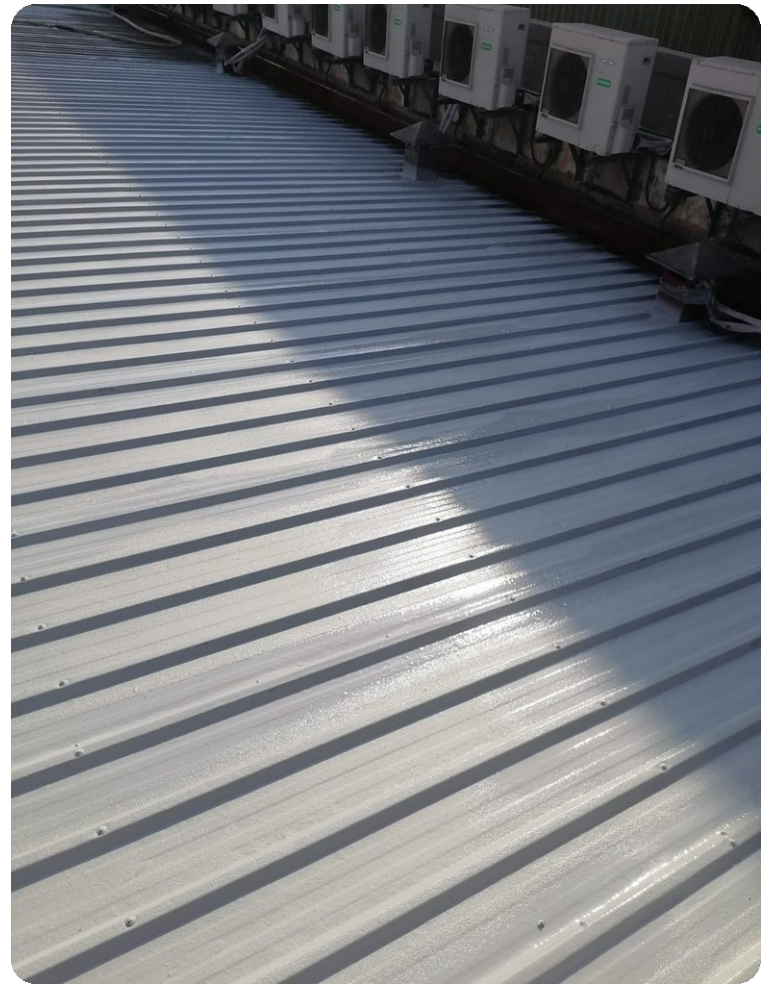

Dubai Municipality-registered systems with full technical and safety data sheets.

Up to a 10-year warranty

On completed waterproofing systems, with responsive after-sales support.

Proven across the UAE

Trained crews, measured film thickness and pinhole testing — from villas to large roofs and tanks.

How We Work

A disciplined process from first inspection to warranty handover.

1. Free Inspection

We assess the structure and diagnose the problem at no cost.

2. Recommendation

The right system for your building — not a one-size fix.

3. Surface Preparation

Cleaning, crack and spall repair, and priming.

4. Application

Machine- or hand-applied to the specified thickness.

5. QC & Testing

Film-thickness checks and holiday (pinhole) testing.

6. Handover & Warranty

Clean site, sign-off, and your warranty certificate.

Recent Projects

A snapshot of live work across the UAE — from industrial roofs to water tanks.

Metal Roof Waterproofing

~1,200 m² · Industrial, Abu Dhabi

Recoated a corroding metal roof in place — sealed every seam, lap and fixing with a seamless, heat-reflective system.

Combo System Waterproofing

~900 m² · Coastal building

Sprayed PU foam, a seamless membrane and a protective top coat over a high-exposure roof deck.

Polyurea Tank Lining

~600 m² · Al Ain

Spray-applied a seamless, corrosion-resistant polyurea lining to the walls and floor of a concrete water tank.

Selected Work

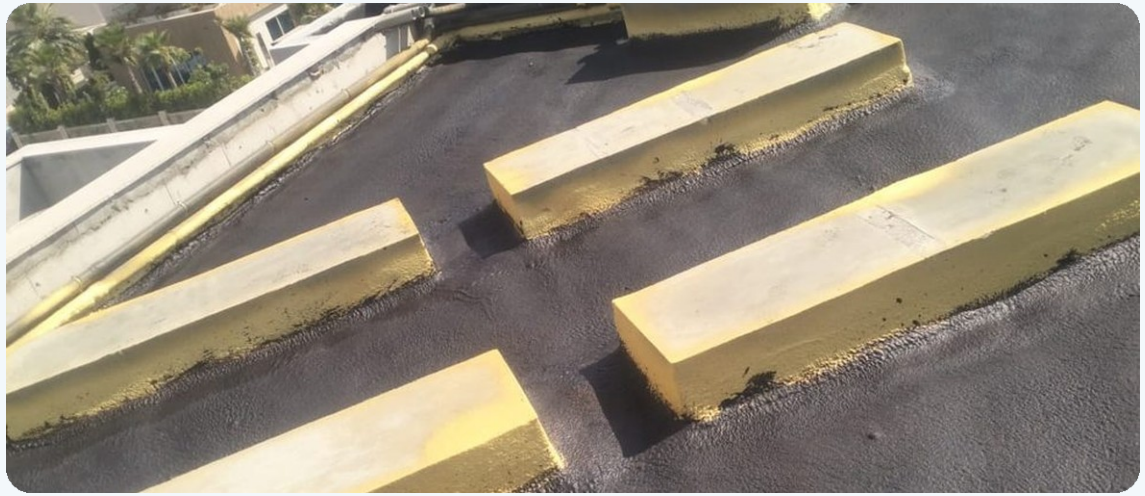

Metal roof recoating — before & after in one frame

Seafront deck sealed against salt, UV and rain

Seamless polyurea lining inside a concrete water tank

Combo system — membrane with PU foam-coved upstands

Materials & Assurance

DM-registered materials

Our systems are built on Kanz Chemical products — a Dubai Municipality registered supplier — with full technical and safety data sheets for consultant and authority approval.

- CRES FLOOR EP 100 — primer
- CRESPOL PR-P / PR-I — polyurea membrane
- CRES FLEX 201 — UV-resistant top coat
- CRESFOAM SF-40 / MD-1 — PU foam

Quality & warranty

Up to a 10-year warranty

on completed waterproofing systems, subject to routine maintenance.

- Pre-application surface & moisture checks
- Wet/dry film-thickness verification
- Holiday (pinhole) continuity testing
- Daily QC log shared with the client
